

DEPARTMENT OF BACTERIOLOGY,  
ST. THOMAS'S HOSPITAL MEDICAL SCHOOL,  
LONDON, S.E.1.

PROFESSOR RONALD HARE.

TELE: WATERLOO 5656 (EX. 52).

14th October 1958.

Dear Esther,

Thank you very much indeed for  
this culture which arrived safely. We are both  
teaching at the moment and also trying to sort  
some of our own things before we go to Yale.  
That is, I should say, if we do in the end go  
to Yale for, believe it or not, the arrangements  
are not yet firm. Correspondence takes a  
long time and unfortunately, we don't have the  
correct documents for the visas yet.

Harewell

Dr. E. C. Tammie - 1948

Stanford University

I hope your trip to Stanford was successful - Elvin says you were looking for a house. We are still dominated by his Kilcollen of one pair of overweight, sagabbling, cats and I recommend the first without the second if that be possible. Bruce & Elvin are collaborating in growing strains of Salmonella further flagella - he has just handed us a draft of a paper on deflagellation.

With best wishes,

Yours sincerely,

Guy -
